COLLEGE INFORMATION SYSTEM

Problem Statement:

The existing system which we are using in the college is traditional process, we were using paper and pen. As admissions and information is increasing day by day it is difficult to maintain in using pen and paper.

SRS:

We maintain day to day information, updates of students and employees. We also manage information of books and question papers which helps in quick and easy access.

→ Educational institutions should be able to add, edit and view student personal details like name, age, gender, email, phone number, address and academic details.

→ Faculty should be able to view all student personal details and should be able to view and edit internal evaluation marks and attendance of students.

→ COE office should be able to view all student details and view and edit internal and external examination marks and publish results.

→ Placement section should be able to view all student details and add companies coming to campus for placements.

→ Management section should be able to view, add and edit teaching and non-teaching staff details.

→ Students should not be allowed to edit their personal and academic details.

→ The system should be convenient and easy to use by students, management and faculty.

→ The system should be reliable source of information viewing for students, COE and faculty.
